Projects

Raisedays: (Angular, NgRx, Angular Material, pusher.js)

<https://raisedays.ca>

- Managed the frontend development of the Raisedays fundraising platform's user, admin, and super admin interfaces using Angular.
- Handled strategic UI/UX initiatives, effectively translating intricate requirements into dynamic, user-friendly designs, further elevating user engagement.
- Vigilantly ensured design cohesion and cross-environmental consistency, guaranteeing a seamless and user-centric experience.

Ed-care: (React.js, Redux, Redux-Saga, Node.js(Express.js), Socket.IO, Bootstrap, MySQL)

- Developed a web application for an education institution that wanted to make an online portal to handle uploading assignments, attendance, grading, lectures, scheduling, and other features which should be available on both student and teacher panels.
- Used ReactJS, React-Bootstrap, and Redux as frontend modules of application and Express.js as a backend framework.
- Developed REST APIs & Microservices with Node.js with the help of passport.js and Mongo.

Tendering: (React.js, Node.js, AWS, Redux, Stripe, Material-UI, MYSQL)

- Created a web application for a private diamond firm using mentioned technologies. The web app was about bidding on different kinds of diamond contracts. The site was made with all the features that should be available on these types of platforms.
- Implemented live price changing and, a chat system for certain types of users using Socket.io with properness to avoid lagging, Stripe Payment Gateway, and Time management of almost all the time zones.

Buyerpix: (Angular, Ionic, NgRx, ng-bootstrap, PouchDB, Apache Couch DB)

- Implemented a Web application using Angular and a hybrid iOS application of the same project using Ionic Framework.
- This project was an E-commerce of clothing.
- Developed UI of both mobile and web applications and enabled the applications to store data locally while offline, then synchronize it with CouchDB and compatible servers when the application is back online, keeping the user's data in sync no matter where they next log in.

Everythink.ai: (Angular, NgRx, Material-Ui)

- Everythink.ai is a No-Code Cognitive Engine Platform that is featured by many prominent companies such as Google, AWS, and Digital Ocean.
- Developed some calendar features, components, and pages and fixed performance issues.
 - Ref Web-App:- <https://everythink.ai/>
